Ironage Designs

Ironage Designs is based in Leek in the heart of the Staffordshire Moorlands, we specialise in iron gates, driveway and security gates, iron railings, all types of decorative ironwork, gate automation and intercom systems. Ironage Designs is a family run business, We pride ourselves on the reputation we have built up over the past few years for design, manufacture and installation of our custom built ironwork.

We offer quality craftsmanship and a quality service on all of our products and all at competitive prices. Why not drop us a call on 01538 384623 and let us discuss your requirements further and provide you with a no obligation quotation.

Our Services

Decorative Iron & Wooden Gates

Ironage Designs manufacture and supply gates for both domestic and commercial use, from large driveway gates, security gates and railing systems to single side gates.

Wrought Iron Railings

We manufacture and supply railings for both private and commercial use, from large factory railings, playgrounds and public/private areas to low level garden railings. Ironage Designs also manufacture and supply wrought iron balustrades, staircases, balconies and decorative ironwork. If you have a design that you would like us to look at we would be more than happy to view your drawings or sketches and provide you with a competitive quotation and realistic time scale for completion.

Commercial projects

Commercial projects are what Ironage Designs prides itself on. We regularly manufacture large span gates, security doors, grills, drive gates and railings and can either manufacture direct from your drawings or we are happy to visit your premises to discuss your requirements further and provide you with a no obligation quotation.

Automation Ironage Designs offer a variety of high quality automation solutions for new and existing gates. We offer a free comprehensive onsite survey to help determine the best option for your type of gate and budget. Gate automation is constantly evolving and we only fit the highest quality systems from a carefully selected handful of manufactures to ensure that your installation will last and continue to run for many years.

Intercom Systems

Ironage Designs offer a variety of high quality intercom solutions for new and existing gates. We offer a free comprehensive onsite survey to help determine the best option for your type of gate and budget.

KIT GUIDE

Lux 2B Kit

Heavy duty hydraulic motors with locking in open & closed positions

- 3500mm max gate leaf width (2000mm for model shown above)
- 300kgs max leaf weight
- Operation time to 90° approx 17 seconds on model shown
- Max 500 operations per 24 hrs
- Variety of LUX motors available:
 - Slowdown
 - Non locking
 - No physical stops required

Kit contains:

- | | |
|---------------------------|----------------------------|
| - 2 x Lux 2B rams | - 2 x Mitto 2 transmitters |
| - 1 x Rigel control panel | - 1 x Pair C130 photocells |
| - 1 x Clonix receiver | - 1 x Antenna |

Lux GV Kit

Heavy duty reversible hydraulic motor

- 3500mm max gate leaf width
- 300kgs max leaf weight
- Operation time to 90° approx 28 seconds
- Max 500 operations per 24 hrs
- Lock required

Kit contains:

- | | |
|---------------------------|----------------------------|
| - 2 x Lux GV Rams | - 2 x Mitto 2 transmitters |
| - 1 x Rigel control panel | - 1 x Pair C130 photocells |
| - 1 x Clonix receiver | - 1 x Antenna |

Icaro Sliding Gate Kit

Mechanical sliding gate motor suitable for commercial & domestic applications

- 240V Single Phase Motor
- Continuously rated - 100% duty cycle
- Built in locking with manual release
- 2000kgs max gate weight
- Motor speed approx 12m per minute

Kit contains:

- | | |
|----------------------------------|----------------------------------|
| - 1 x ICARO motor | - 1 x Pair C130 photocells |
| - 1 x Leo Internal control panel | - 1 x Antenna |
| - 1 x Clonix receiver* | - 4m toothed rack of your choice |
| - 2 x Mitto 2 transmitters | |

*Clonix receiver required if application requires more than 64 transmitters.

P4.5 Kit / P7 Kit

Heavy duty hydraulic motors for commercial and industrial use.

- P4.5 - 4500mm max gate leaf width
- P7 - 7000mm max gate leaf width
- 500kgs max leaf weight
- P4.5 Operation time to 90° approx 30 sec
- P7 Operation time to 90° approx 45 sec
- Max 500 operations per 24 hrs
- Electric lock required
- Slow down on closing phase

P4.5 Kit contains:

- 1 x P4.5 motor
- 1 x Rigel control panel
- 1 x Intric receiver
- 2 x Mitto 2 transmitters
- 1 x Pair C130 photocells
- 1 x Antenna

P7 Kit contains:

- 1 x P7 motor
- 1 x Rigel control panel
- 1 x Intric receiver
- 2 x Mitto 2 transmitters
- 1 x Pair C130 photocells
- 1 x Antenna

Gate Automation

Unlike many other supplies we supply the FULL automation kits.

No need to buy anything else, you will receive a complete kit for immediate install.

Igea Kit 240V / Igea BT Kit 24V

Mechanical gate post mounted motor allowing installation on larger pillars

- Locking motors
- 2500mm max gate leaf width
- 250kgs max leaf weight
- Operation time to 90° approx 15 seconds
- Max 100 operations per 24 hrs

Igea Kit 240V contains:

- 2 x Igea 240V motors
- 1 x Altair control panel with built in receiver
- 2 x Mitto 2 transmitters
- 1 x Pair C130 photocells
- 1 x Antenna

Igea BT Kit 24V contains:

- 2 x Igea 24V motors
- 1 x Libra MAR control panel with built in receiver
- 2 x Mitto 2 transmitters
- 1 x Pair C130 photocells
- 1 x Antenna

Phobos L Kit 240V / Phobos BTL Kit 24V

Either 240V or 24V low voltage electro-mechanical gate mounted motors suitable for residential use

- Locking motors
- 3000mm max gate leaf width (5000mm with a lock)
- 250kgs max leaf weight
- Operation time to 90° approx 20 seconds
- Max 60 operations per 24 hrs
- Slowdown available on 24V Kit
- No physical gates stops required on 24V Kit

Phobos L Kit 240V contains:

- 2 x Phobos 240V motors
- 1 x Altair control panel with built in receiver
- 2 x Mitto 2 transmitters
- 1 x Pair C130 photocells

Phobos BTL Kit 24V contains:

- 2 x Phobos 24V motors
- 1 x Libra MAR control panel with built in receiver
- 2 x Mitto 2 transmitters
- 1 x Pair C130 photocells

VIRGO Kit 24V

Electromechanical operator for swing gates, suitable for residential use

- Locking motors
- 2000mm max gate leaf width
- 200kgs max leaf weight
- Operation time to 90° approx 15 seconds
- Max 60 operations per 24 hrs
- Slowdown available

VIRGO Kit 24V contains:

- 1 Master motor with built in control panel and receiver
- 1 Slave motor
- 2 x Mitto 2 transmitters
- 1 x Pair C130 photocells
- 1 x Flashing light with antenna

ORO Kit

Electro-hydraulic gate mounted motors suitable for residential use

- Locking in closed position
- 1800mm max gate leaf width
- 180kgs max leaf weight
- Operation time to 90° approx 20 seconds
- Max 60 operations per 24 hrs

Kit contains:

- 2 x ORO motors
- 1 x Rigel control panel
- 1 x Clonix receiver
- 2 x Mitto 2 transmitters
- 1 x Pair C130 photocells
- 1 x Antenna
